Biography

Born and raised in Bavaria, I previously studied and taught languages before focussing on art. Now based in Northwich, Cheshire I maintain a particular interest in language, its semantics and social contexts with a focus on feminist issues and have recently completed a MA in Fine Art.

Since the pandemic my practice grew to include a poignant scenography of my fluctuating mental state absorbing current affairs and news. Bi-polar like sentiments of despair and gloom, hope and cheerfulness, fear and endurance result in investigations, interpretations and reactions, inspections of the inside versus the outside documented in my work. Collated magazine images, old art work, current newsprint, paint, photography and found objects amalgamate and intra-act, creating visions and telling stories of the complex dynamic and surreal interior landscape of my emotions.
