## Biography

Abstract paintings and prints inspired by land and the sea. I am a visual artist (and triathlete) with a studio here in Chester and making artwork inspired by my time on the bike, in the water, and out running - often with Ruby, my Labrador.

My fascination is with colour, line and shapes “found” in the landscape and I work with how to express the feeling of being in my environment.

The seascapes are an unusual combination of wax, watercolour and graphite, and then produced as Giclee prints - an artist quality product that will not degrade or yellow over time. I make my own frames for these prints using salvaged wood found in reclamation yards, my allotment and the odd skip. It wouldn't be unusual to see a frame made from old cattle gates, pub benches or North Wales farm fencing.

Other abstract pieces are works on paper or acrylic on cradled board.
