Biography

Living in Chester I work from my studio and sell through galleries and art fairs. Having graduated with a textiles degree and later an MA in art I am constantly challenging my creative development and embracing new techniques. My paintings are a journey between the materials, observation and emotion which keep my work personal. My landscapes and florals follow a tradition of research through drawing and photography which I modernise into a contemporary state revealing the abstract within nature and our environment. My art is liberating with no boundaries.
